Professional Summary

Computer Science Engineering undergraduate at Chitkara University with a strong foundation in Data Structures and Algorithms, Object-Oriented Programming, DBMS, Computer Networks, and software development. Experienced in frontend and backend development using React, JavaScript, Node.js, Express.js, HTML, CSS, and Tailwind CSS. Solved 250+ Data Structures and Algorithms problems on LeetCode and regularly participate in coding contests and technical challenges.

Education

Chitkara University, Punjab	2024 – 2028
B.Tech in Computer Science Engineering	CGPA: 9.01/10
Government Girls Senior Secondary School (PSEB)	2024
Class XII	

Technical Skills

Programming Languages: C++, Java, C, JavaScript, SQL
Frontend Development: HTML, CSS, React, Tailwind CSS
Backend Development: Node.js, Express.js, REST APIs, JWT
Databases: MySQL, MongoDB
Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Computer Networks
Developer Tools: Git, GitHub, Git Bash, GitHub Actions, Postman, VS Code, Docker, Vercel
Version Control: Branching, Merging, Pull Requests, Code Review, Merge Conflict Resolution

Projects

Romify – AI-Based AR Model *React, JavaScript, AR Integration, AI*

- Developed an AI-based AR home decor visualization platform enabling users to visualize decor products in real-world environments.
- Built interactive frontend components and integrated AR-based visualization to create an immersive product exploration experience.
- Optimized user interaction flow and rendering performance to improve overall usability and user experience.

Personal Portfolio Website *HTML, CSS, JavaScript, React*

- Designed and developed a responsive portfolio website showcasing projects, technical skills, and achievements.
- Built reusable UI components and optimized layouts for desktop and mobile devices.
- Integrated GitHub, LinkedIn, and contact workflows for professional accessibility.

Smart Parking IoT System *ESP32, IoT, Sensors*

- Developed an IoT-based smart parking system using ESP32 to monitor parking-space availability.
- Implemented sensor-based detection to identify occupied and available parking spaces.
- Designed the system to provide real-time parking-status information for efficient space management.

Achievements

- Solved 250+ Data Structures and Algorithms problems on LeetCode across multiple algorithmic topics.
- Maintained a CGPA of 9.01/10 in B.Tech Computer Science Engineering.
- Regularly participate in coding contests and technical challenges.
- Strong foundation in problem solving, algorithms, and software development.
